Tapeswitch Corporation announced today that they will be officially introducing their newly designed MultiZone Controller at ProMat 2009 in Chicago, IL. Compatible with Light Curtains, Safety Mats, Edges, and Safety Bumpers, this innovative high-performance controller is designed to give Tapeswitch customers a new level of system responsiveness.

This is one of many new concepts that are being worked on at Tapeswitch's corporate office. Al Russel, Chief Engineer adds, "This is another step forward in the Manufacturing and Automation industry." The company is also expected to introduce a line of mat edging as well as multi-directional safety bumpers.

For more information about Tapeswitch's new Multizone Controller, contact 631-630-0442 or email [blipsman@tapeswitch.com](mailto:blipsman@tapeswitch.com).

Tapeswitch designs and manufactures innovative sensing, switching, and control products for use in machine guarding, personnel protection and other safety and control applications. Tapeswitch products include ribbon switches, sensing edges, and bumpers, safety mats, touch pads, controllers, and light curtains. If a standard product just won't do the job, extensive custom design services are available.
